

Vee 120 Degree Workstations

Designed from every angle

APF Furniture Systems combine intelligent design with extraordinary value to provide modern adaptable office furniture that defies tradition.

In keeping with this philosophy we are proud to introduce Vee 120 Degree, a well designed, versatile office desking solution providing three 120 degree desk positions. Vee 120 Degree is a cost-efficient system designed to meet both the current and future needs of varying workplace applications.

Vee 120 Degree Workstation

- Vee 120 Degree: 1500, 1800 or 2100
- Also available in custom sizes
- *Privacy screen length

Versatility

Ideal for individual or team collaboration, Vee 120 Degree provides a clean modular design that facilitates fast and easy installation or reconfiguration to meet the evolving needs of any organisation.

Vee 120 Degree has clean and functional lines with its angled leg detail. It is custom made and available in a combination of sizes and designs that are limitless to suit any office environment.

Vee Designed Leg

The gently curved Vee leg design is strong and durable. The wide stance of the Vee leg ensures the stability of the frame whilst also creating a modern, quality look. The foot of the leg can rotate freely. This ensures the table remains stable over uneven floors. The steel and durable nylon construction provides durability and a longer lifespan.

Height Adjustable Leg

The technician height adjustable leg enhances practicality and versatility providing true ergonomic consideration for your entire workforce. The Vee leg come with a White Satin or Precious Silver Pearl powdercoat finish with a chrome extendable leg.

PowerPak Under-desk Services

The PowerPak is the perfect solution for electrical and data reticulation between the desks in an office. The PowerPak features a two tier basket with mounting brackets that screw to the underside of the workstation or back into the modesty panel and allows the basket to 'snap' into the bracket.
